

April 25th, 2018, UAE Dubai Blossom by Babilou Education takes home 2 extraordinary awards, “The Best Workplace Sustainability Program” and “Article 13” award.

Blossom by Babilou Education offers 10 centers across Dubai, each strategically located to facilitate a working parent’s life on the go. The nursery is not just a learning process, each child is cared for and stimulated to reach his or her own potential by remaining consciously aware of how their actions affect the world. Children at Blossom practice caring for our surrounding areas through recycling, repurposing, planting and energy conservation.

The Happiness @ Work Award in partnership with Forbes recognizes the quotient of happiness existing among entities of the region during the first ever awarding ceremony. The award reiterates His Highness Sheikh Mohammed’s vision of making the UAE one of the happiest nations across the world.

We all know that creating a happy workplace culture, cultivates, involves and reinforces employees’ role in a sustainable future. Happy and engaged workplaces have a positive impact on employees and the business. Engaging and empowering employees to help them achieve their sense of purpose, makes them happier, healthier and socially adept. Happy employees are more productive, creative and collaborative and have a positive impact on the organization. Forward-thinking businesses are increasingly recognizing that happiness translates into tangible business outcomes and has an impact on the bottom line. At Blossom by Babilou Education we are proud to be the first nursery in the UAE to become certified Carbon Neutral and are widely recognized as the ‘green nursery’ of Dubai.

During the 2017 Happiness Awards ceremony Zahra Hamirani, Founder of Blossom Nursery and CEO of Babilou Middle East stated “our focus in our education is building awareness - developing a knowledge destiny amongst our children- the leaders and decision makers of tomorrow and we fully acknowledge that without our wonderful educators this wouldn’t be possible”.

Blossom by Babilou Education’s happiness journey started in the classroom by encouraging children to create their own individual ‘knowledge destinies.’ The learnings acquired therein were reinforced by the desire to become something larger than an academic centre. Hamirani explained, “at Blossom CSR is not optional - it is firmly bolted in our DNA.” Blossom by Babilou education firmly believes in investing in their staff and empowering the teams. Each of us has a voice - we share our best practice and at the same time ensure we are eco-cautious- Says Remedios Bondoc Junior Educator at Blossom Nursery.

Tonight we are truly honoured to be the winners of the “Article 13 award” said Hamirani. Article 13 is an organization that seeks transformative potential of integrating planetary boundaries and social thresholds into your business strategy. The nursery groups have big plans on further expanding their footprint in this aspect, Blossom by Babilou Education contribute to sustaining a rainforest in Mali and will continue to share best practice, making the world a little more magical!

About Blossom by Babilou Education

Babilou
Middle East Education

Today Blossom by Babilou Education offer 10 centres across Dubai. Together The nursery Group offers different learning approaches to cater to every family's needs. The Blossom Nursery was founded in 2009 in Dubai as a modern nursery provider catering to dual income, working families. Blossom has six locations across Dubai offering the British Early Years Foundation Stage curriculum along with its proprietary Skygarden approach. Winner of numerous awards including "Best Nursery" and SME100 rankings and founded on the Triple PPP (people, planet, prosperity) approach we are proud of our educational leadership and training through our Cache license and membership in global early years professional associations. Blossom by Babilou Education educates 1000's of children with over 200 team members ensuring delivery of quality education provided in our secure and stimulating environments.
